

High-frequency circuit experiment (experimental lesson series teaching colleges)

Filesize: 7.54 MB

Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

(Robyn Nolan)

HIGH-FREQUENCY CIRCUIT EXPERIMENT (EXPERIMENTAL LESSON SERIES TEACHING COLLEGES)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 105 Publisher: Chongqing University Pub. Date :2007-10-01 version 1 This material is more comprehensive description of the contents of the experimental high-frequency circuits and equipment use. including a tuned amplifier experiment. high-frequency power amplifier . LC capacitor feedback three-point oscillator. crystal oscillator. amplitude modulation. amplitude modulation wave signal demodulator. mixer. varactor tuner. FM wave demodulation. voltage-controlled oscillator of frequency modulation. phase-locked loop Application of frequency demodulation and Multisim circuit simulation of high frequency experiments. The teaching materials for different institutions. all levels of professional teaching high-frequency circuit experiment; its biggest advantage is that it is suitable for teaching these courses open. because the content in the experimental materials. experimental materials. experimental arrangement of platforms and experimental hours so that teachers and students can have a very loose reference choice. Contents: Part 1 High-frequency tuning circuit hardware Experiment 1 Experiment 2 high-frequency amplifier power amplifier (C) experiments 3 LC capacitive feedback experiment 4 three-point oscillator crystal oscillator experiment 5 6 AM amplitude modulation wave signal test solution transfer experiments 7 mixer experiments varactor tuner 8 9 FM wave demodulation experiment experiment experiment consisting of 10 VCO frequency modulation experiment consisting of 11 phase-locked loop frequency demodulator Part 2 High-frequency circuit simulation a. Multisim8 Software Description Second. simulation software. the basic operation of experimental 1 Multisim8 Experiment 2 high-frequency small-signal analysis of resonant amplification circuit performance test frequency resonant power amplifier circuit 3 Performance Analysis of experimental 4 LC oscillator circuit performance analysis of experimental analysis of experiments 5 AM 6 detector circuit performance analysis of Section 3 to design a high-frequency circuit courses. curriculum design objectives and requirements Second. design a curriculum design task AM 2 AM transmitter receiver design design...
