Fire Administration, National Fire Data Center, 1992. OCLC Number: (OCoLC)71341474 Subject: Fire fighters -- Mortality -- Pennsylvania -- Brackenridge. Excerpt: . . . USFA-TR-061 December 1991 5 The residential building to the rear is an architectural match for the fire building and a bridge once connected the two buildings to provide access to the owners apartment. Two steel beams still spanned the rear driveway, connecting the ground floor of the fire building with the second floor of the building at the rear. The bridge and the door that provided access to it were removed in an earlier renovation. There were no exterior stairs or fire escapes, and the building contained no fire alarm, detection, or sprinkler systems. The only exterior access to the ground floor was at the front of the building and the only exterior access to the basement was at the rear. An interior stairway near the center of the building linked the basement and ground levels. The basement foundation walls were concrete, and the exterior walls above were brick over terra-cotta tile...

Reviews

An extremely wonderful pdf with perfect and lucid information. Better than never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.

This publication will be worth purchasing. It is written in straightforward words and not hard to understand. I am just very happy to explain how here is the best ebook we have read in my own lifestyle and might be the best publication for at any time.
