Date :2011-8-1. This book is based on National College Building Environment and Equipment Engineering fluid mechanics. fluid transmission and distribution network. two courses syllabus written. The book is divided into two from top to bottom. a total of 14 chapters. One chapter is on the hydrodynamics; next to fluid transmission and distribution network. Each chapter are incorporated into the appropriate amount of exercises and examples. Compared with the similar materials. fluid and transmission and distribution network more highlights practical. theoretical derivation of some of the complex to give a certain degree of simplification; attention as much as possible to contact the professional engineering practice; in the bottom two in the using uniform concepts. definitions and symbols. to avoid the two courses of similar materials in the formulation of the problem is not uniform. Book is concise. easy to understand. help students to use ability. Book for the higher education environment and equipment engineering construction materials. but also for the environment. power and other professional students and engineering officers. Contents: papers on the role of fluid mechanics Chapter 1 Introduction Section II in the fluid force on the fluid mechanical properties of the main fluid motion described in section III methods and mechanical models exercises Chapter hydrostatic strength and hydrostatic Section Section II of its characteristic strong hydrostatic pressure distribution of the basis for calculating the third quarter and fourth units of the liquid column manometer to measure V VI liquid equilibrium equations of fluid relative balance exercises Chapter one yuan-based fluid dynamics Section constant flow and constant flow of non-flow line and Section III one yuan trace the continuity equation flow model...
