

Voyage Aux Villes Maudites Sodome.--Gomorrhe.--Seboim.-- Adama.--Zoar

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 74 pages. Original publisher: Palo Alto, Calif. : Stanford University ; Moffett Field, Calif. : National Aeronautics and Space Administration, Ames Research Center, 1990 OCLC Number: ocm27861126 Subject: Supersonic transport planes. Excerpt: . . . planform area of 5 of the wing planform area located near the wing tips provide adequate control authority in case of engine failure. 2. 3 Payload Size Affecting Wing Geometry The wing can be tailored in such a way that we obtain a Sears-Haack area distribution, elliptic lift and maximum utilization of the volume for payload and fuel. This was accomplished with the following approach: The total empty weight of the OFW for a given payload relates directly to the wing planform area. So the maximum payload fraction is obtained at the maximum payload floor fraction $Sp S$. For a given payload the required wing size can be determined by the assumption of the Sears Haack Area distribution and given minimum internal dimensions to accommodate the payload. Fig. 2. 1 shows the available fraction of the planform area used by passengers and cargo plotted against the maximum root section thickness and the root...
