Brand New Book ***** Print on Demand *****.Excerpt from Memoirs of the Geological Survey England and Wales: The Geology of the Country Around Ringwood The area described in this Memoir forms the north-western portion of the Hampshire Basin, including a fine range of chalk hills bordering Cranbome Chase on the north-west and a part of the picturesque woodland of the New Forest on the southeast. The original geological survey made by H. W. Bristow and Joshua Trimmer was published in 1858 on the old series map, sheet 15; and it is satisfactory that no important alterations have been found necessary in the boundaries which were then drawn on the old map to indicate the Tertiary and Cretaceous divisions. The re-survey was carried out during the years 1896- 1900, mainly by Mr. Reid in the Tertiary ground, and by Mr. Bennett in the Cretaceous area; Mr. Dixon assisting to finish the work around Cranborne Village, Horton, and Verwood. In the course of this new survey the Drifts have been mapped, and the special studies made by Mr. Reid on these superficial deposits have led him...
