

## On Polymer/Nano-particle Composites

Filesize: 4.51 MB

### ***Reviews***

*This publication is wonderful. I have got study and so i am confident that i am going to likely to read once again once more down the road. Its been designed in an exceedingly straightforward way which is only soon after i finished reading this ebook by which actually altered me, change the way i think.*

## ON POLYMER/NANO-PARTICLE COMPOSITES

To read **On Polymer/Nano-particle Composites** PDF, you should access the button beneath and download the ebook or have accessibility to other information which might be have conjunction with ON POLYMER/NANO-PARTICLE COMPOSITES ebook.

Book Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Characterization and Numerical Modeling of Mechanisms about Fracture Toughness and Fatigue Resistance of Epoxy/Nano-silica/Nano-rubber Composites | Over decades, nanotechnology thrived through science and technology. For polymer nanocomposites, radical changes in many properties were seen. If uccessfully exploited, it will achieve the critical requirement of multi-functional properties from single material. However, previous explanations are mostly plausible or inconclusive. Besides, results are mixed specially on toughness. Thence, it is in this book that a systematic investigation is provided for the understanding of structure-deformation-property relationships. Two aspects, fracture toughness and fatigue resistance, are analysed with aids of microscopic techniques and analytical tools. Deformation sequences and underlying mechanisms are unveiled to establish a quantitative modeling arriving at toughness. Moreover, thermal softening and fatigue crack propagation are browsed. The book is of direct interests to postgraduates, researchers and practitioners, who work with polymers, material characterization, fracture mechanics, fatigue and modeling of PNCs. More generally, mechanical engineers, polymer modifiers, material chemists and physicists can also find useful information. | Format: Paperback | Language/Sprache: english | 414 gr | 280 pp.
