Excerpt: . . . runoff, snow melt runoff, and surface runoff and drainage. In their Phase II stormwater regulations EPA defined a municipal separate storm sewer to mean in part, a conveyance or system of conveyances, including roads with drainage systems and municipal streets, that is owned or operated by a State, city, town, borough, county, parish, district, association, or other public body designed or used for collecting of conveying storm water which is not a combined sewer and which is not part of a Publicly Owned Treatment Works. The nature of stormwater runoff from a given rainfall or snow event changes as an area urbanizes and more impervious surfaces are created and the landscape and drainage patterns are modified. The volume of runoff, rate of flow, and quality of runoff all change as a result of this urbanization. HISTORICAL DEVELOPMENT OF STORMWATER SYSTEMS In the late 1800 s and early 1900 s combined sewers were built to convey and...
